<h3>Additive Manufacturing</h3> <p> </p>	<h3>Robotics</h3> <p> </p>	<h3>Operations Optimization</h3> <p> </p>
<h3>Energy</h3> <p> </p>		

Let Lab is a joint venture by Ham-let and the Israel Innovation Authority. It is the first industrial innovation lab in Israel. We serve as a development ground for young start-up companies in the area of Industry 4.0. We aim to push the start-ups through a rigorous 12-month programme by providing them with up to one million NIS in funding, guidance from industry experts, access to our manufacturing facilities, business development and access to customers. [Learn more on: www.let-lab.com](http://www.let-lab.com)

About this map: We are showcasing companies that are less than 4 years old and still active in the field of industry 4.0 applications. **To view the full list or to add companies we miss, Use the IIoT startup sheet:** <https://bit.ly/2IkLssW>
